thanks for this Carmen. that's great movement. congrats. As you note, CTSN access will be key are we have moved to **CSIS** for distribution of all products and I believe (belief only) that that is only on CTSN. Also, are you in contact with ar [REDACTED] in [REDACTED] so they know your intelligence requirements? They will be the ponies pushing out the intel as it does not flow through me or my office.

Hope all is well.

Cheers, Bo

Subject: Update on secure infrastructure

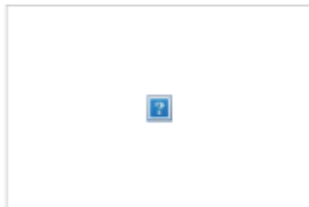

Good afternoon Bo

I wanted to give you an update further to our discussion in the fall as to the options on secure access in the OCCE.

We do have access to Secret level via GCSI imminent, at the [REDACTED], so not in the same building but much better.

I also am moving forward with an MOU for access to CTSN via a partner agency within [REDACTED]. I will be working on that at the fastest pace possible and we will need training on the new dissemination system, but I am hopeful we can be in a position to receive regular reporting via electronic means in the very near future.

Thought I would share this excellent news with you.
